Assistive Technology

The mission of the **Texas Technology Access Program (TTAP)** is to increase access for people with disabilities and those who are aging to **Assistive Technology (AT)** tools and services.

AT may provide individuals with more control over their immediate environments; an enhanced ability to function independently; potential access to education, vocation and employment; and more opportunities for recreation/leisure activities and community engagement.

TTAP provides AT Device Loans, Demonstration Centers, Recycle/Reuse Programs, and Financing. Short-term device loans are available for 35 days. Individuals with disabilities or those who are aging may borrow devices to see if they can work well for them. Devices range from items which improve hearing, vision, and speech communication, but also technology for the home or even playing video games.

For example, you can borrow a Google Nest Smart Kit which includes a Google Nest Mini, a Philips Hue Bluetooth Starter Kit, Ring Doorbell, IPad with case, Kardia Mobile, Distance thermometer, oximeter, and blood pressure cuff.

Contact the Texas Technology Access Program to learn more and see if you are eligible.
