There is a difference between **home health care** and **home care**.

- **Home health care** provides skilled, short-term medical care including a visit from a nurse, physical therapy, occupational therapy, etc. which has been ordered by a doctor to treat a medical condition. These services are covered by Medicare.
- **Home care** offers long-term, non-medical assistance with daily tasks such as bathing, cleaning, and companionship. These services are not covered by Medicare.

View the Centers for Medicare and Medicaid Services official government booklet on [Medicare and Home Health Care](#) for information on eligibility, the services covered, how to find and compare home health agencies, and your Medicare rights.

Go online to [Medicare.gov](https://www.medicare.gov) to find and compare home health agencies.

GUIDE Model

The **Guiding an Improved Dementia Experience (GUIDE) Model** is an innovative Medicare-supported program designed to help families care for loved ones with dementia at home. It provides expert guidance, caregiver support, and respite services at no additional cost for those who qualify.

You may qualify for GUIDE services if:

- You have traditional Medicare Parts A & B, and you are not on a Medicare Advantage plan, PACE program, or receiving hospice care.
- You have a diagnosis of dementia confirmed by a clinician. It is possible you may qualify if you have an early memory loss diagnosis.
- You live at home or in the community (not in a nursing home or long-term care facility).

Participation in the CMS GUIDE Model varies by location. Below are two entities in the Amarillo-area participating in the GUIDE program. Contact them directly for more information regarding eligibility and to see if you reside in their service area.
